

Focus

POS SYSTEMS

MYFOCUS MOBILE

Focus POS Systems introduces myFocus Mobile, part of the myFocus Web Suite package. Always on the go but need to stay in the know? myFocus Mobile provides powerful access to detailed sales, labor, audit and status information from your iPhone, Android or other mobile devices.

MYFOCUS MOBILE MANAGEMENT SYSTEM

myFocus mobile brings the great features and drill-down details of the nFocus dashboard right to your fingertips.

MYFOCUS MOBILE

The myFocus Mobile management app allows restaurant managers access to detailed sales, labor, audit and status information real-time, right from their mobile device. Installation only takes a minute – myFocus Mobile is available in the iPhone® App Store and the Android Market. Part of the myFocus Web Suite, myFocus Mobile is perfect for owners and managers who commute to work, travel frequently or take vacations. You can check up on your store at home, in the car, at the airport or even on the beach.

FEATURES

DISCOUNT ALERT

- Instant alert based on discount threshold amount

VOID ALERT

- Instant alert based on void threshold amount

VARIABLE PRICE ALERT

- Instant alert based on variable price threshold amount

RETURNS ALERT

- Instant alert based on when an item is returned

PAID OUT ALERT

- Instant alert when a pay out has been processed

OFFLINE ALERT

- Instant alert if credit card processing is turned offline

MOBILE ALERT SYSTEM

The myFocus Mobile Alert system is a powerful store-based risk assessment and monitoring tool built directly into your Focus POS System. Focus Alerts allow you to create a risk profile unique to your business. This profile is used by Focus Monitor to identify transactions that exceed allowable thresholds. Real-time text message alerts are then automatically sent to you or your staff with details of the questionable transaction.

BATCH PROBLEM ALERT

- Instant alert if the current batch has not been settled

MANAGER ALERT

- Employee-triggered alert with custom messages

VARIABLE PRICE ITEM ALERT

- Instant alert when an open item is ordered

TIME CARD CLOCK IN ALERT

- Time-based alert if the opening employee has not clocked in

CLOSE DAY PROBLEM ALERT

- Time-based alert if the business day has not been processed

SUPPORT NOTIFICATIONS

- Built-in close day and batch alerts included
